Subject: Report on Task One Completion

Dear Sir,

I am writing to provide a comprehensive report on the successful completion of Task One. This report aims to highlight the key aspects of the task, the strategies employed, and the outcomes achieved.

1. Task Title: Task One involved is to develop a responsive web page for the Company Member Team.

2. Task Overview: Task One involved is to develop a responsive web page for the Company Member Team. Write company name first. Show company Founder or leadership/management team first. Then company other section for example development section team. And last add company sells and marketing team.

3. Steps Taken:: Task One I am first dividing into four ways. Firstly Header Section, Second Management Section, Thirdly Development Section and lastly Sales and Marketing Section. First I am completing Header Section for All Device Responsive Web Pages. Then I divided the management section into two parts first showing two people and then three people. Also using Flex to display two sections. Similarly using Flex for next two sections. And using MediaQuery to make it responsive. And using a back in the side corner with css. And using media query to grid for the last two sections for viewing on small devices

4. Challenges Faced:: I am facing change to style used above all by hand. I am fixing it from various sources. Also I have to face many problems using css. Other than that I face no problem.

5. Solutions Implemented: Google solved two problems. I am learning a lot while solving this problem. Although I already knew it, I know it well and I can use it.

7. Lessons Learned: Through the course of Task One, several valuable lessons were learned, including Google sourcing, how to divide each project in a beautiful way. Also, how to place a section in a corner and how to create a triangular structure. Also, I am learning about responsive..

8. Project Update:: I can finish the projects very well. Completing each section well and responsive for all devices. Project finished on my first day. Doing everything I understand. If there is any mistake it may be without my knowledge. I am testing every section. I think it is ready for delivery now.

10. Next Steps: Looking ahead, I am ready to leverage the insights gained from Task One to excel in subsequent tasks. I am committed to maintaining the same level of dedication and excellence in my future endeavors.

I appreciate your time and consideration of this report. Please feel free to reach out if you have any questions or require further clarification.

Thank you for the opportunity to contribute to the success of the project.

Sincerely,

Rs Liton Mahmud
